

Worksheet #1 | *Our Biases & Preconceptions* | 23 January 2008

Name:

1) List three ways in which the building we currently occupy controls our environment to provide our comfort.

2) According to *The Architecture of the Well-Tempered Environment*, how might a purely massive or structural environmental solution *fail* to provide for comfort? Give two examples.

3) Based on examples illustrated in *Design E² / The Green Apple*, how might the design and construction of a new skyscraper *benefit* the air quality of the surrounding neighborhood?

4) In the context of designing buildings, how do you understand the phrase: "Being Less Bad is No Good"? (Use the opposite side of this page, as required.)
